Abrasives

Abranet Strips

Sizes available:
70mm x 198mm & 70mm x 420mm
P80, P180

Abranet Files

Sizes available:
70mm x 198mm & 70mm x 420mm

Foam Pads

Fine, Micro fine, Super fine

Mirlon Pads

Micro fine, Ultra fine, Very fine

Production Paper

Size 70mm x 5m :
P36, P40, P60, P120, P150

Sanding Belts

Cut to size on request

Water Paper

Grits available:
80, 100, 120, 180, 220, 400, 600
800, 1000, 1200, 1500, 2000, 2500

Adhesives

Q-Bond

Pekay

Pratley

- Tough Acrylic, 3rd generation adhesive
- Easy 3 step bonding system
- Excellent on aluminium and will join almost all well matched surfaces!
- Will bond on mild oily surfaces
- Note: Shelf life of between 1 and 3 years, depending on storage temperature peaks

- Exceptionally high strength, hand mouldable, putty-like adhesive
- Similar to Pratley Putty Standard Setting (Original) except it sets much faster
- Can be used underwater, but not as easy to apply underwater as Pratley Putty Original

- Very versatile adhesive which every family will find useful in the home
- Can be used in applications where the adhesive should not be visible e.g. on ornaments
- Different from White Glue and is not thixotropic
- Adheres to most rigid materials

- Quick setting adhesive metal filler and mender
- Sets very hard and matches the colour of most ferrous metals
- Sets rigidly and can facilitate filing, sawing, machining and sanding within 2 hours

HB BODY Automotive Refinishing

110 BODY SEAL

Waterborne seam sealer for high quality bonding and sealing in the internal and external parts of the car body. Also suitable for wood and for marine uses. Dries quickly and remains permanently elastic. It is also suitable for exterior surfaces (Quarter panels, wing edges, door skins etc) that are directly exposed to UV rays. Retains its shape, and is over coatble with all paint systems.

S115 AUTO SEAL

Rubber based sealer, specifically developed to bond metal surfaces and joint fillings. It is also suitable for the inner automobile parts that are not directly exposed to UV rays. Applied easily with a manual or pneumatic gun or brush. Dries fast, depending on the thickness, remains elastic and dimensionally stable. After drying it can be overcoated by any type of paint systems with high ageing stability.

SPOT REPAIR PRIMER

Fast drying primer suitable for repairing small imperfections. Fast drying and the excellent levelling guarantees efficient application and easy sanding. Available black, grey and white colour

HB BODY Automotive Refinishing

F217 FIBERLIGHT

2K fiberglass light polyester filler for bridging and filling of cavities.

Also suitable for filling over corroded surfaces.

Easy to apply, dries quickly and is extremely easy to sand with P100 - P120 grit paper.

Resulting in a high resistant and elastic surface.

F220 BODYFINE - 1KG

2K extra fine polyester stopper / filler for minor imperfections on surfaces.

Ensures a smooth surface and a perfect feather edge.

Easy to sand with P150 - P400 grit paper to obtain a perfect pinhole free finish.

Also suitable for plastic bumper repairs.

F220 BODYFINE - 250MG

2K extra fine polyester stopper / filler for minor imperfections on surfaces.

Ensures a smooth surface and a perfect feather edge.

Easy to sand with P150 - P400 grit paper to obtain a perfect pinhole free finish.

Also suitable for plastic bumper repairs.

HB BODY Automotive Refinishing

F222 BUMPERTSOFT

2K elastic polyester filler with excellent adhesion to plastic bumpers excluding PE (Polyethylene). Simply wipe with a non woven pad and degrease using Antisil 770 (Normal) or Antisil 771 (Fast) prior to application. Extremely easy to sand with P120 - P180 grit paper for a perfect pinhole free finish. Does not clog sand paper. Excellent mechanical resistance due to its high elasticity.

LENS CLEAR

LENS CLEAR is a special designed elastic clear that gives a gloss look to the front or tail lens. The perfect solution for lens that become yellow and fade due to weather conditions. Easy application and fast drying with durable protection. Remove the upper fade film from the lens by sanding and apply two coats.

700 PAINT REMOVER

A transparent coating suitable for the removal of paint, clear coats and latex materials from all metal surfaces. Also suitable for cleaning of paint tools (e.g. spray guns, spatulas, etc). Applied with a brush or spatula. It stays active for 30 - 60 minutes. Will not effect the metal surfaces underneath the paint that is to be removed.

HB BODY Automotive Refinishing

BODY 611 MULTI FILLER

2K Multi polyester based filler appropriate for use on all metallic and wooden surfaces.

An excellent filler that spreads smoothly, giving a pinhole free finish.

Easily applied and extremely easy to sand using P80 -P120 dry grit paper.

U951 AUTO FLEX - BLACK

Rubber-based sound deadening / sealing product.

Suitable for application to the internal or external parts of the underbody, with high ageing stability.

Ready for use, it is applied with a special spray gun (BODY UBS) at a pressure of 5-6 bar (A shortened nozzle results in a fine finish where as a long one in a course finish).

Permanently elastic, fast drying, very good adhesion and it can be over painted "wet on wet" with synthetic paints or with single coat/base coat.

Adhesion promoter 340 PLASTOFIX can be used before any top-coat application for even better results.

U951 AUTO FLEX - WHITE

Rubber-based sound deadening / sealing product.

Suitable for application to the internal or external parts of the underbody, with high ageing stability.

Ready for use, it is applied with a special spray gun (BODY UBS) at a pressure of 5-6 bar (A shortened nozzle results in a fine finish where as a long one in a course finish).

Permanently elastic, fast drying, very good adhesion and it can be over painted "wet on wet" with synthetic paints or with single coat/base coat.

Adhesion promoter 340 PLASTOFIX can be used before any top-coat application for even better results.

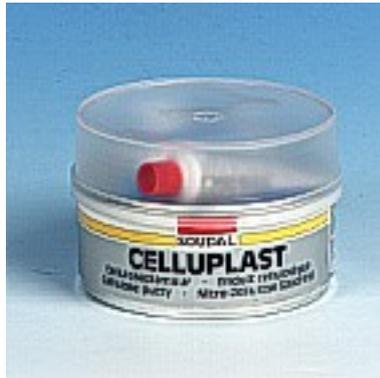

Body Fillers

SOUDAL

PRODUCT:

CELLUPLAST

DESCRIPTION

CELLUPLAST is a ready to use, 1 component cellulose based putty for finishing layers.

APPLICATION AREAS

- Filling of small tears and cracks in car bodies, polyester, wood
- As finishing layer before painting or varnishing
- Repair product for surface damage on car bodies, boats, surf boards
- As finishing layer to counter unevenness and fill small holes in polyester putty.

Body Fillers

PRODUCT:

METAL PLASTIC UNIVERSAL

DESCRIPTION

METAL PLASTIC UNIVERSAL is a two component polyester putty based on unsaturated polyester resins.

APPLICATION AREAS

- Filling of tears, dents, scratches and cracks on car body parts made from non-ferro metals or zinc coated steel, polyester
- Repair of damages on boats, surfboards etc

CHARACTERISTICS

- Very easy to apply
- Excellent bond on all metals, even non-ferro metals and zinc coated substrates, polyester, wood
- Can be sanded both dry and wet

PRODUCT:

ZINC SPRAY 500ML

DESCRIPTION

ZINC SPRAY is a ready to use high quality sprayable zinc compound which is applied from an aerosol can.

APPLICATION AREAS

- Protection against corrosion and rust in car body and ship building
- Electrical conductor on welding points
- Can be used as primer or finishing layer
- Can be used as primer to improve adhesion on two parts which must be welded together

Body Fillers

Product	Liteweight Bodyfiller + Hardener
Codes & Pack Sizes	10282 – 1kg 10283 – 5kg (Dispenser Pack) 10284 – 5 kg
Basic Raw Materials	Liteweight - Polyester resins Hardener - Benzoyl Peroxide
Suitable Substrates	Steel, aluminium and galvanised surfaces
Surface Preparation	Metal surfaces -Degrease and dry sand with P80 grit, Existing surfaces -Strip to bare metal by dry sand with P80 grit then dry feather edge with P180 grit. Finally wipe with Prekleen or Lacquer Thinners before applying bodyfiller.
Mixing Ratio	2.5% hardener by weight 3 - 4cm paste hardener to 30g filler <u>Note:</u> dispensers are available for 5Kg packs.
Application	Mix well until a uniform green colour is achieved. Press firmly when applying with applicator at 60° angle, stroking on layers in one direction only. This will eliminate air bubbles and ensure a substantial bond. Apply in thin layers.
Pot Life/Gell time	When mixed 4 to 6 minutes at 25°C
Cleaning of Equipment	Use lacquer thinners
Drying Time	Ready to flat 1 hours at 25°C 45 minutes at 40°C
	<u>Note:</u> Do not exceed 70°C to avoid cracking, bubbling or loss of adhesion
Recommended Sanding	Once cured flat with P80 manual or P180 grit mechanical Do not wet flat.
Shelf Life	6 months at 25°C. See batch No
Storage	Store in a cool, dry place out of direct sunlight. Keep out of reach of children. Keep container closed when not in use.

Car System

Elastic weiss

polyester fine putty white

CHARACTERISTICS

Elastic weiss is a 2K-polyester filler developed specially for the body painter and fulfilling the highest demands of quality

- High standard of quality
- The optimum working material for the body painter.
- For use on steel surfaces only
- Not for use on zinc and aluminium surfaces

APPLICATION

Because of its qualities of filling pores in the area of filling and base putty area, this fine putty can also be used to repair small scratches and paint defects.

Available in:

1 kg
2 kg

Fill

polyester body putty

CHARACTERISTICS

Fill is a filling and base putty quality with very high thixotropic properties.

- high viscosity
- concentrated filler
- for use on steel surfaces only
- not for use on zinc and aluminium surfaces

APPLICATION

For filling in deep uneven areas and dents on vehicle bodywork in the area of cars, lorries, buses and railway vehicles

Available in:

1 kg
3 kg Dispenser

Glas

polyester fibreglass reinforced putty

CHARACTERISTICS

Glas is a further development of fibre putty

- Improved sanding characteristics
- Spreads more smoothly and homogeneously
- Highly concentrated filler
- Adhesion to metallic bases
- For repairing small rust spots
- For use on steel surfaces only
- For use on zinc and aluminium surfaces

APPLICATION

For filling in deep uneven areas and dents on vehicle bodywork in the area of cars, lorries, buses and railway vehicles

Available in:

2 kg

Car System

Multi

polyester multifunctional putty

CHARACTERISTICS

Multi putty is a universal adhesive polyester putty

- Adhesion to galvanised steel sheeting
- Adhesions to aluminium and steel surfaces
- Adhesion to tin-plated surfaces
- Highly concentrated filler
- Very easy and pore-free to work
- Extra easy to sand

APPLICATION

Because of its properties as a filling and fine putty, Multi putty can be used universally.

Available in:
2 kg
3 kg Dispenser

Karosserie-Dichtmasse

sealing compound - brushable

CHARACTERISTICS

Car System Brushable Seam Sealer is a synthetic rubber-based sealant that can be applied with a paintbrush. This quick-drying product creates an elastic, heat and cold-resistant (25° C to +80° C) layer that can be painted over and is impervious to water and mineral spirits.

APPLICATION

Waterproof sealing of joints, particularly when aftermarket body parts, covering trim pieces, etc. are installed in places that will later be painted. Body protection for weld seams.

Car System

Bumper Structurant Spray

bumper rebuild spray black

CHARACTERISTICS

CS Bumper Structurant Spray quickly allows structural rebuilding on damaged plastic parts and plastics. After application and drying can be painted over with all current paint systems. in the required colour shade.

APPLICATION

CS Bumper Structurant Spray is for application in the area of motor vehicles e.g. for bumpers, attached parts, exterior mirrors.
In the interior e.g. for fascias, boot covering and door covering

Lackiergrundierung

primer

CHARACTERISTICS

This product is a nitro-cellulose-based primer with excellent anti-rust properties. This all-weather primer also dries quickly.

APPLICATION

Primer Surfacing Spray serves as an adhesive base and surface preparation for all paint jobs.

Zink-Spray

anticorrosive

CHARACTERISTICS

Zinc Spray is a zinc epoxy resin-based spray for cold galvanization of metallic base surfaces. Zinc Spray is electrically conductive and can withstand temperatures of up to 490°C. 97% zinc content.

APPLICATION

Cold galvanization spray to prevent galvanic corrosion on metal surfaces. Zinc Spray is also suitable for painting over spot welds.

Car System

Auto Mask

handy masking film incl. adhesive tape

→ **Appliance**

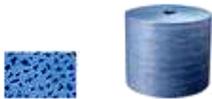

Masking foil with integrated masking tape for quickly covering windows, shock absorbers, bumpers, etc.

→ **Characteristics**

For use with manual dispenser.

Car Clean Multi

paper cleaning cloth

→ **Appliance**

For absorbing large volumes of solvents, oil and lubricants.

→ **Characteristics**

Very absorbent, robust and solvent-resistant cleaning cloth.

Car Disc white

polishing sponge incl. back pad

→ **Appliance**

For machine use with Refinish 1.

→ **Characteristics**

Polishing pad made from solid foam with integrated back pad.

KS-Dual Gun

gun for underbody protection

→ **Appliance**

Professional gun for anticorrosive, underbody protection and body cavity protection.

→ **Characteristics**

Pneumatic with rapid action coupling.

Car System

Multi-Mix Cup / Lid

mixing cup and lid

→ **Appliance**

High-quality disposable mixing cup for clean and precise mixing of all paint materials, such as base paints, clear coats, fillers, etc.

→ **Characteristics**

Transparent cup with a mixing scale from 1:1 to 5:1.

Pump Spray

pressurized atomizer

→ **Characteristics**

For applying (atomizing) liquids evenly and consistently. Solvent-resistant due to Viton seals.

Touch Up

bottle with brush - fillable

→ **Appliance**

Customer hand out bottle for spot repairs, such as stone chip damages.

→ **Characteristics**

Unbreakable bottle with a brush.

Fine Line Tape Blue

paint line tape

→ **Appliance**

Masking tape for multi-colour and design painting. Suitable for curves as well as for long straight lines.

→ **Characteristics**

Waterproof and temperature resistant to 155 °C, excellent solvent resistance.

WR-Lifting Tape

masking tape with plastic strip

→ **Appliance**

Special masking tape for protecting rubber profiles on bonded windscreens, as well as for covering headlamps, rear lights and direction indicators.

→ **Characteristics**

Consisting of a masking tape and a high-strength transparent plastic strip. Waterproof, temperature resistant up to 120 °C.

Dominion

DOM032

STEP UP TO
20 score
full FULLY **20** PREPARED!

3 in 1 Grey Primer (454g)
Flexible • Fast Drying • East Sanding

REDUCE your cycle time with this great 3 in 1 Primer. Great for use on metal, aluminum, SMC, plastics and fiberglass.

Also works great over body filler and other sanded areas prior to painting. This primer offers great flexibility and film build with minimal overspray.

Sandable in as little as 15 minutes and paintable in as little as 30 minutes. A versatile product that meets all of your primer requirements.

DOM020

GRAVEL GUARD is an easy to use high build, paintable rocker coating that matches OEM textures and provides excellent abrasion and chip protection, sound deadening, and corrosion resistance.

DOM025

SURE TEX is a flexible texturing material that is made to match most OEM bumper and vinyl dash pad textures. Unique bulk formulation provides maximum versatility in duplicating most OEM grains and textures by easily adjusting fluid and air control valves on the spray gun

Presta Polish

Chroma 1500

- Cleans and removes minor surface imperfections and oxidation
- Contains no waxes or silicones

Presta 2000

- Removes swirls from surfaces
- Produces a clean, high gloss finish
- Contains no waxes or silicones

Aurora 3000

- Removes swirls & scratches
- Works on enamels, lacquers and basecoat / clearcoat finishes

Scuff Stuff

- Ensures paint adhesion in hard to reach places
- Removes waxes, sealers, road film and soils from auto finishes
- Rinses away completely

Shampoo

- All purpose interior shampoo
- Adds lubrication to wet sanding water

Radiant

- Creates & restores gloss to interior & exterior rubber
- Produces brilliant gloss on tires
- Contains no silicone

Strata Ultra Cut

- Removes coarse through fine sand scratches from fresh & cured paint
- Produces outstanding gloss on all automotive coatings
- Restores gloss to marine coatings
- Contains no waxes or silicones

P1 One Step 1kg

- Removes coarse through fine sand scratches from fresh & cured paint
- Produces outstanding gloss on all automotive coatings
- Restores gloss to marine coatings
- Contains no waxes or silicones

P1 One Step 5kg

- Removes coarse through fine sand scratches from fresh & cured paint
- Produces outstanding gloss on all automotive coatings
- Restores gloss to marine coatings
- Contains no waxes or silicones

DEVILBISS
The Right Way To Finish™

Technical Specifications:

Air inlet pressure: 2.0 bar (29psi)

Air inlet thread: 1/4" Universal

Cup Capacity: 560ml

Weight: 778 gms

Air cap and ring: Plated brass

Fluid tip: Stainless steel

Fluid needle: Stainless steel

Starting Line Gun

Technical Specifications:

Consumes 136 L/min so a small portable 1 hp air compressor is sufficient to operate the gun

Standard 1/4" air inlet connection thread

Recommended working pressure 2.5 bar (35 psi)

Complete range of parts & accessories available

SRI – Touch Up Gun

DEVILBISS
The Right Way To Finish™

Technical Specifications:
Weight: 13.7 oz (380gr)
Air Inlet: 1/4" BPS & NPS
Fluid Passages: Aluminum
Feed Type: Gravity feed
Available in: 0.8mm, 1.0mm

Finishing Line Gun

Technical Specifications:
Body: Aluminum
Weight: 27 oz. w/cup
Air Inlet: 1/4" NPS (M)
Fluid Inlet: 3/8" BSP (F)
Fluid Passages: Aluminum

Infrared Paint Curing Systems

With the advent of regulations controlling paint product emissions, water based and high solids paint products are becoming more and more commonly used in automobile repairs. These new paints and repair products require longer drying times with traditional drying/curing methods.

Infrared (IR) solves this problem by DRAMATICALLY reducing Curing times and costs.

INFRARED - PROVEN TECHNOLOGY

INFRARED is different from other curing methods in many ways. It dries or cures by penetrating through the wet coating and heating the layers underneath. A "bottom up" cure or "curing from the inside out" is superior to the "top down" process associated with other curing methods in that it produces a more thorough cure, and more heat can be applied without fear of skinning and solvent popping.

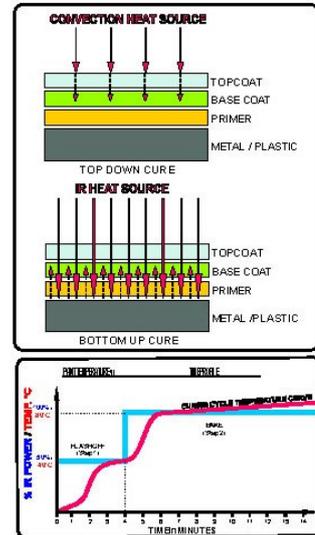

INFRARED's higher and focused heating energy reduces cure times while improving quality. Reduced curing times results in less time for dirt to settle on the wet surface.

INFRARED IN PRACTICE

In order to achieve the optimum curing of the paint repair products it is necessary to control the infrared energy so that overheating, solvent boil and other heat related paint defects are avoided.

Control is effected by maintaining a fixed distance during the curing cycle as well as ensuring that the temperature of the paint follows the two step cycle as indicated in the diagram on the right.

Adherence to the temperature curve is achieved through using time and power control, and positioning the IR at a fixed distance. The first step is the FLASH OFF at 50% IR power which is necessary to remove all the solvents before full BAKE starts. At 50% power and the correct distance from the paint surface the solvents are unlikely to boil. After the preset period ends (usually 4 minutes) the BAKE period starts at 100% IR power and ends after the preset period has been reached (usually 8-10 minutes). Once FLASH OFF has occurred 100% of the IR power can be safely applied. Our custom designed controller achieves all of this.

Hotbox

The HOTBOX cures colour matching test plates. It can be located next to the paint colour matching/mixing system. It will help to save time and energy costs.

Features:

- † Maximum area that can be cured - 100mm x 120mm
- † Power - 150W

Econocure®

The **ECONOCURE®** accommodates the budget without compromising functionality.

The drying of primers, colour coats, top coats, body fillers and adhesives can all be efficiently dried or cured.

Features:

- † Curing area - 700mm x 600mm
- † Stable and mobile system
- † Adjustable height from 0.2m to 1.8m
- † Maximum Horizontal reach of 800mm
- † Single Adjustable timer sequence

Handycure

For those small jobs, especially touch ups on the inside of the auto body. Curing adhesive, softening plastic parts to ease fitting are some of the many applications.

Features:

- † Power 1kW with RC SW Element
- † Optional 1.5kW RR SW Element
- † Curing area - 100mm x 350mm
- † Can be detached from stand
- † Light weight
- † Ergonomic handle for user comfort.
- † Stand 1.8m High

The Econocure Range

- † 3kW 220 Vac with dual timer & 50 - 100% power control

Infrared Paint Curing Systems

Procure®

The **PROCURE®** accommodates both budget and the professional functional requirements of the automotive body repair industry. The **PROCURE®** can reach all the possible areas of a repair including high vehicles such as 4x4's and panel vans.

•Features:

- Maximum area that can be cured:
3kW Unit - 700mm x 600mm
- Stable and mobile system - rear castor wheels have brakes for added stability
- Adjustable height from 0.2m to 2.5m
- Dual Adjustable timer sequence for flash off and bake
- 50 - 100% Power settings for both flash off & bake periods
- Maximum Horizontal reach of 1200mm

The PROCURE Range

- † 3kW 220 Vac with dual timer & 50 - 100% power control

Supercure

The **Supercure®** is a fully fledged professional paint curing system. The system can reach all the possible areas of a repair including high vehicles such as 4x4's and panel vans. The system runs from an overhead rail system which folds away neatly allowing for more uncluttered work space.

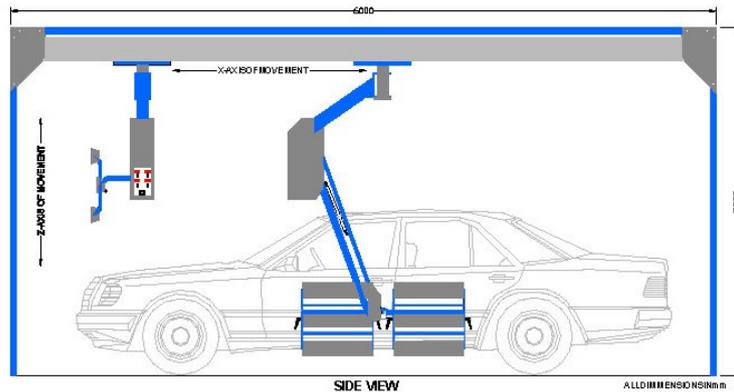

In addition the rail systems allows for larger heating banks so that larger areas can be cured at one time.

Features:

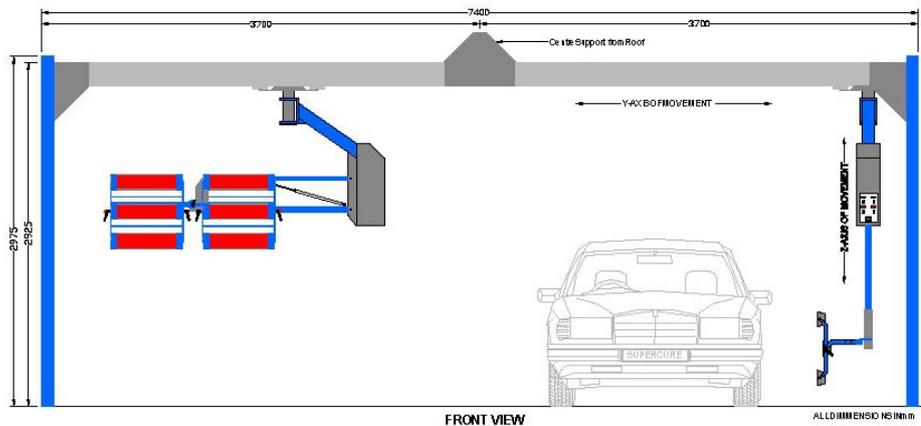

- † Maximum area that can be cured:
3kW Unit: 600mm x 600mm
6kW Unit: 1800mm x 600mm
- † All heater banks hang on easy-glide, self balancing cassette arms
- † Adjustable height from 0.2m to 2.5m
- † Dual Adjustable timer sequence for flash off and bake
- † 50 - 100% Power settings for both flash off & bake periods
- † Alarm signal for end of cycle
- † Can reach any exterior area on repair vehicle
- † Cassettes can be adjusted for curing corners and edges

Supercure Range

- † 3kW 3phase 220Vac + Neutral - 1 set of 3 Heater Cassettes
- † 6kW 3phase 220Vac + Neutral - 2 sets of 3 Heater Cassettes

Welding Blanket - Sapphire

DESCRIPTION

The **Welding Blanket** protects vehicle exteriors and interiors from grinding sparks and welding spatter.

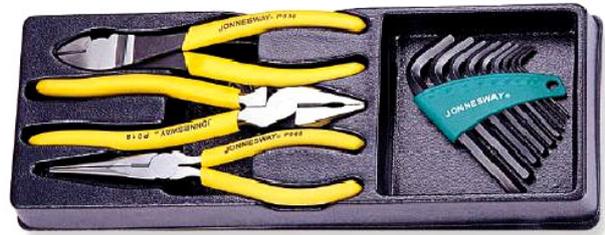

CHARACTERISTICS

- Large blanket size – 2000mm x 2000mm. – fixes easily in place with masking tape.
- Obviates the need to strip parts before welding or grinding.
- Totally non-flammable – withstands temperatures far in excess of sparks & splatter.
- Soft, non-abrasive blanket-like feel – will not scratch or scuff the most delicate of luxury finishes or paint jobs.
- Easy-to-handle, lightweight fibre material.
- Non-toxic – produces no toxic gasses when exposed to heat or flame.
- Easy to clean by shaking out or light brushing.
- Packed in zip-up polyurethane see-thru bag for permanent storage and cleanliness.
